

GILKYSON DENIES BORDEN'S CHARGES

Politics Not Responsible for His Opposition, Jersey Adjutant General Asserts

RECALLS BUGBEE CAMPAIGN

Special Dispatch to Evening Public Ledger, Trenton, June 16.—“Absolutely and unqualifiedly false.” Thus Adjutant General Frederick Gilkyson designates charges made by Brigadier General Borden as to the former's activities in opposing Borden's election to command of New Jersey's troops.

This denial is the form of a statement made by General Gilkyson to the legislative committee investigating alleged irregularities in Borden's election.

General Gilkyson stated that General Borden has attempted to cloud the testimony of witnesses regarding the latter's military qualifications by trying to show that General Gilkyson was responsible for the opposition shown Borden by the National Guard. General Gilkyson declared it to be Borden's intention to have the committee infer that Gilkyson advocated General Borden's advancement in the guard until Gilkyson failed to use General Borden in a political way.

In his statement General Gilkyson attributed a “malicious falsehood” to former captain J. Osgood Nichols, State militia when the latter said that General Gilkyson requested the captain to circulate among the militiamen at a Sea Girt “Governor's Day” and work in the interest of State Comptroller Newton A. K. Bugbee, who was at that time a gubernatorial candidate. It was said by the Adjutant General that if the statement made by Captain Nichols was brought to the attention of William X. Runyon, then Governor, the latter might not have credited them, as he never referred to Nichols' statement.

TNT AIDS FIGHT ON PLAGUE

By-product of Explosive Declared to Have Beneficial Effect

New York, June 16.—One of the by-products of TNT discovered during the war, dichloramine T, has been discovered to have a beneficial effect on tuberculosis, according to a report by Dr. Edward J. Murray at the National Tuberculosis Convention yesterday at the Waldorf-Astoria.

Dr. Murray declared that the new product was not a panacea, but had proved helpful in a small number of experimental cases, and recommended it to the profession for further study.

JUMPING the Hedge of Convention

She was ready for her bath. The kindly old head priest stood by the side of her tub in her temple lodgings near the Hall of Ten Thousand Lamps.

An American woman, on a “Summer Pilgrimage to Sacred Kova-San,” tells how she handled this and other gently delicate situations in a country of unconventional conventions in the July

DUTCH HONOR U. S. WOMAN

Star Discoverer of Harvard Gets Degree From Groningen University

Cambridge, Mass., June 16.—Miss Annie J. Cannon, of the Harvard Astronomical Observatory, has received from Groningen University in Holland an honorary doctor's degree in mathematics and astronomy, in acknowledgment of her work in the study of stellar spectra. She is one of the first American women to receive such a distinction.

Miss Cannon has long been regarded as the leading American woman astronomer. She has completed a monumental catalogue of the spectra of some 220,000 stars all over the heavens, which when published will occupy nine quarto volumes. No such comprehensive study had ever been made before.

She has also discovered three new stars and 150 variable stars, and has completed a bibliography of various stars containing about 45,000 references.

U. S. MUST AID GERMANY

Purchase of Bonds Unavoidable, Says Federal Reserve Board

Washington, June 16.—(By A. P.) Absorption of substantial blocks of German reparations bonds is “unavoidable,” the Federal Reserve Board said today in a formal discussion of the reparations settlement.

Termination of the reparations controversy is viewed by the board as an economic triumph, opening up a promising outlook for future European adjustment with a special bearing upon the position of the United States.

“This is found,” the board said, “in the fact that the adjustment unquestionably eliminates the most serious element of uncertainty that has affected international trade since the war. So long as there was hesitation regarding the final settlement, trade between Germany and all other nations, including the United States, was necessarily more or less interrupted.”

HORRORS OF “NEXT WAR” POINTED OUT BY GEDDES

Ambassador Urges International Unity at Elmira Women's College

Elmira, N. Y., June 16.—(By A. P.)—Declaring “any nation that believes it can live and prosper entirely in its own home is wrong,” Sir Auckland Geddes, British Ambassador to the United States, urged stronger international unity for the purpose of peace at the commencement exercises of Elmira College for Women.

“Peace will never be made where the nations' councilors meet,” said Sir Auckland, “unless it is first made by the mothers, teachers and educators who have implanted in the children an understanding of their duties to the world.”

“The next war will see destruction such as cannot even now be imagined—the wiping out of populace, wealth and the work of thousands of years. Yet the knowledge of this will not prevent war, if a nation thinks it can win.”

“I believe there is but one way out of the present world bickering, and that is that this nation and Great Britain should work together to help the world out of its predicament.”

Kijja Beauty secret of old Egypt

Will increase the beauty of any woman of any age—make you look younger too—marvelous for the complexion. Sufficiently successful results are guaranteed in three days to prove to you that its continued use will make you look years younger and marvellously increase the beauty of your complexion, or your money will be refunded by the manufacturer, sold by all leading department stores and drug stores.

PURSE FOR DR. McELMOYLE

Supporters Pledge \$2000 for Elkton's Ousted “Marrying Parson”

Elkton, Md., June 16.—At a meeting of a group of members of the Presbyterian Church last night a committee was named to raise \$2000 to be presented to the Rev. John McElmoyle, the “marrying parson,” who has been removed from the pulpit here after a service of twenty-eight years. Dr. McElmoyle has been admitted to the Baltimore Presbytery, having withdrawn from the New Castle Presbytery.

The controversy over the removal of Dr. McElmoyle has become so bitter that some members of the church pass each other on the streets without speaking.

The church has been closed by the action of the Presbytery and may remain closed all summer. The elders, it is said, refuse to call a congregational meeting to elect new elders.

Driver Escapes Death in Crash
William Rich, thirty years old, 245 Lamonte street, Roxborough, driver of a coal autotruck, escaped with only cuts of the scalp at 8 o'clock this morning when a northbound passenger train hit the truck at the Wright street crossing.

Rich was hurled clear of the rails. He was taken to the Memorial Hospital, of the Pennsylvania Railroad. The coal truck was thrown over on its side. Rich is employed by the Maunayunk Coal and Lime Co.

Is the human mechanism equal to the strain of modern life?

IS the average American becoming a physical sham? Medical authorities, after examining thousands of workers, have shown that the average man uses less than one-third of his lung capacity; that over 400 of his muscles are actually weakened by disuse.

Calling attention to this startling condition, the late E. E. Rittenhouse of the Life Extension Institute said: “Time and labor-saving devices have radically changed the living habits of a vast number of people. Physical exertion has greatly declined. The mortality rate from the wear and tear of life is abnormally gaining. The average American has no time to waste. He is getting bald. His eyes have been strained by the close focus of inside work—hence the eye glasses. His teeth need attention. He never walks when he can ride.”

With every forward step, advancing civilization puts new strains upon the human mechanism. It is vitally necessary for every one of us to conserve his energy—to prevent the inroads of fatigue.

Whenever the drain on nervous energy is too great for a few hours' sleep to replace, fatigue becomes an ever-present menace.

One of the greatest sources of fatigue to-day is pounding with hard heels on still harder pavements. Every step you take on old-fashioned leather heels or ordinary “dead” rubber heels acts as a hammer blow to the delicate nervous system.

The average man takes 8000 steps a day—suffers 8000 jolts and jars. Constant repetition of these jolts and jars tends to exhaust your energy, to produce that tired-out feeling you so often experience.

Remove this cause of fatigue

You cannot change the pavements but you can change your heels. O'Sullivan's Heels absorb the jolts and jars that tire you out.

To secure the resiliency, the springiness of O'Sullivan's Heels, the highest grades of rubber are blended by special formula. With this blend of live, springy rubber are “compounded” the best toughening agents known. The compound is then “cured” or baked under high pressure.

The same process that makes O'Sullivan's Heels resilient gives them their great durability. O'Sullivan's Heels outlast three pairs of leather heels—they often outlast two pairs of ordinary rubber heels. Stop pounding away your energy. Go to your shoe repairer to-day and have O'Sullivan's Heels put on your shoes. **Insist on getting O'Sullivan's!**
